Subject: broadcast radio mods

I want to learn a little more about radio electronics, and I
thought that one way to do it would be to take one or two of
the cheapo transistor radios I have lying around (and never
used) and attempt to modify them to pick up, say, the 140 or
150 MHz region instead of 88-108. I'm looking for where I
might find information of a general nature on simple transistor
receivers, and I'm not finding what I expected. What I really
thought I'd find was a book on transistor radio repair, but
I suppose nowadays you just throw a cheap radio out and buy
another for 5-10 bucks.

Anyway, that's the deal -- any pointers to books, magazine
articles, personal experience, etc.?

Thanks,
Ed Lieser

Subject: Using video sender for ATV???

Hi,

Is it possible to use a video sender (those little units intended to send a TV signal from one room to another) for Amateur television? Can anyone tell me where I might be able to purchase an amp suitable for boosting the video sender output to a few watts or more?

Please e-mail as my USENET feed is less than reliable :(
